

A PLATFORM FOR SUSTAINABLE CHANGE

Eden Suite is a web-based solution for all your carbon and sustainability management needs including: data management, monitoring, analysis and reporting.

Developed by enterprise systems integration specialist Intelligent Pathways, Eden Suite is built on a powerful platform of data exchange that provides a robust mechanism for environmental data capture and validation.

- Track a comprehensive range of Scope 1, 2 and 3 emissions tailored for your organisation
- Wide range of data input methods to support multiple sources
- Configure to suit your unique organisational structure and reporting requirements

STRUCTURE	CAPTURE	INFORM	REPORT
Configure system for your organisational requirements	Collect and validate your environmental data with ease	Track and report your carbon performance with confidence	Prepare data to support reporting for internal and external stakeholder requirements
• Build out organisation and asset hierarchies • Activity management • Data distribution • Scalability	• Data Exchange Network • Data Verification • Data Standardisation	• Monitoring • Comparing and Analysing Data • Interactive Reporting • Compliance Reporting	• Aligned to internal metrics • Compliant to mandatory and voluntary reporting standards

WHAT DOES THIS MEAN, PRACTICALLY?

STRUCTURE	CAPTURE	INFORM
<i>What can I track with Eden Suite?</i>	<i>How can I group assets to reflect my organisational structure?</i>	<i>What compliance standards will Eden Suite align to?</i>
• Energy (consumed and produced) • Water • Waste • Transport • Consumables (e.g. paper) • A wide range of Scope 3 • Other CSR activities can also be tracked	• Asset Hierarchies (e.g. buildings within a site) • Organisation hierarchies (eg. business units within an organisation) • Portfolio views of tenants or organisations	• GHG Protocol Reporting • NGER Reporting • Climate Active Reporting • NABERS Reporting • Additional standards on demand
